

ABOUT US

Founded by Fertilizer Canada in 2008, the **Nutrients for Life Foundation** in Canada is a registered charitable organization committed to bringing educational materials to the classroom with a focus on soil science and agricultural sustainability.

Together, educators, community groups, scientists, and representatives from the agricultural sector produce science-based curriculum content for Canadian schools.

NFL supports the sustainable use of nutrients to improve soil health, support the production of nutritious food, and preserve green spaces.

We address critical issues such as food and water security and agricultural sustainability using materials vetted by the Smithsonian Institute.

Types of events that NFL offers throughout Canada:

- ◆ School Learning Gardens
- ◆ Classroom and field programs
- ◆ Promotion of global sustainability practices such as 4R Nutrient Stewardship
- ◆ Professional development opportunities

IN 2019 WE REACHED

269,806

PEOPLE THROUGH PROGRAMS, MEETINGS AND ADVERTISING EFFORTS.

OUR TEAM

We have three staff who collectively look after our educational programs across the country.

We also have a board of directors with members from the fertilizer industry, private businesses and educational organizations.

FLAGSHIP PROGRAM

Our flagship program is our **learning garden program**, which began in 2015 and offers from \$500 to \$3,000 grants to 40-50 schools across the country each year.

We offer in school, in class and teacher training to schools. We have provided learning garden grants to 234 schools over the last six years.
